

East of England
Trauma Network

East of England Directory of Rehabilitation Services

Edition 9 – March 2023

Directory of Rehabilitation Services And On-Going Care Providers

Please note, the East of England Trauma Network does not necessarily endorse or recommend any service listed in this Directory and no liability for the accuracy of information can be accepted - the quality of the information in the Directory is as provided by the services.

This Directory is not exhaustive and is correct (based on returns from services) as of 28 February 2023.

Additional information will continue to be collected and any new services added to future editions.

Directory Contents

	Pages
<u>Services based in Bedfordshire</u>	4 - 15
<u>Services based in Cambridgeshire</u>	16 - 55
<u>Services based in Essex</u>	56 - 76
<u>Services based in Hertfordshire</u>	77 - 87
<u>Services based in Norfolk</u>	88 - 104
<u>Services based in Suffolk</u>	105 - 113
<u>Services outside the EoE that provide to the area</u>	114 - 183

Please note that the base of the service is not indicative of the area that the service covers - many have a wider catchment area.

Each service provider has colour coding which identifies the specialist areas in which they provide care as per the key below:

KEY TO COLOUR CODING OF PAGES

Yellow = Adult services
Pink = Paediatric (Children)
Green = Amputee
Blue = Brain injury
Orange = (Physical) Disability
Red = Spinal cord injury
Purple = Tracheostomy/ventilator care

Services Based In Bedfordshire

Headway Bedford

Main Speciality	Ongoing cognitive rehabilitation for male and female adults over 18 following an acquired brain injury.		
Host Trust	N/A		
Address	Headway Bedford, Bedford Health Village, 3 Kimbolton Road, Bedford, MK40 2NT		
Contact Telephone Number	01234 310310		
Website	https://www.headwaybedford.org.uk/		
Service Lead	Faye Hickey		
Contact e-mail	mail@headwaybedford.org.uk		
NHS or Private Organisation?	Private Organisation		
Service Overview	<p>The main service is at the centre, and clients have access to a wide range of activities. Physiotherapy, Speech and Language Therapy and Occupational Therapy on-site. Clients can attend cognitive sessions; these provide them with the chance to learn more about their brain injury, common effects and strategies they can use to make their everyday life easier. There are adapted kitchens on-site as well as an IT suite so they can re-learn practical skills. There are leisure activities such as art and digital photography, and a visiting Mindfulness Tutor to help with wellbeing. Clients are allocated a Rehabilitation Co-ordinator who sets goals with them and can signpost to different organisations in the local area to address other needs.</p> <p>Headway Bedford also has a Community Brain Injury Advisor service. The CBIA meets with people in their own homes or out in the community and works with them on individually tailored, goal-focused programs to support them in achieving objectives such as finding appropriate social activities, accessing health and rehabilitation services, returning to work or finding volunteering opportunities. The CBIA can provide information and education about brain injury and support by advising which aids, strategies and tools can make life after brain injury easier.</p>		
Exclusion Criteria	Under 18 years of age. Medically unstable. Unmanaged psychiatric disorder. People who are engaging in the misuse of drugs or alcohol. Congenital disorders; Progressive conditions. Double incontinence.

Service Overview	<p>Askham Court is a 12 bedded unit, which has been designed specifically for patients seeking rehabilitation input to assist them to manage living as independently as possible following traumatic injury to brain or spine, or traumatic amputation. All rooms are en-suite, with overhead tracking and independent access. The Service helps patients achieve their goals and supports patients who present with highly complex physical disability needs and/or complex cognitive and behavioural needs. The service provides a range of therapies on site including Physiotherapists, Occupational Therapists, Speech and Language therapy, Hydrotherapy, Psychology and Medical support alongside our daily activities, nursing, and care services. The multidisciplinary team are supported and guided by Consultants in Rehabilitation Medicine. Askham Court is one of the few units in East Anglia which integrates robotic-led rehabilitation into person-centred bespoke services</p> <p>Askham Court is equipped and staffed to work with patients whose primary needs are complex, including tracheostomy/ventilation, complex spasticity, prolonged disorders of consciousness, and who require specialist medical and complex therapy interventions. In addition, patients whose primary needs are for moderately severe cognitive and behavioural management which may include behaviours that present moderate risk, those requiring close monitoring and part time 1:1 supervision, who present with neuropsychiatric issues and require the design and delivery of structured rehabilitation programmes.</p>			
Exclusion Criteria	Under 18 years of age Under Mental Health Section Severe challenging behaviour which could be a risk to other residents			Brain

Service overview	<p>Community based neurorehabilitation delivered in the patient's location by a dedicated neuro team that includes neuro-physiotherapists, neuro-occupational therapists, and therapy assistants. There is also some input from Clinical Psychology for patients after brain injury. Patients can also be seen in dedicated gym space in bases in Cambridge, Doddington, Ely, Wisbech, Huntingdon and Peterborough. The Community Speech and Language Therapy team work alongside for patients with these needs.</p> <p>The stroke Early Supported Discharge Service is for those who have had a stroke meeting ESD criteria and are transferred directly from the acute stroke units. The service provides up to six weeks rehabilitation, either in the home or in a community inpatient bed. The team is made up of a full multi-disciplinary team including stroke specialist nurses and therapy assistants who are trained in stroke therapy.</p>	
Exclusion criteria	Under 18 years of age Primary diagnosis of functional disorder People who are acutely medically unstable	
Catchment area	People who are registered with a Cambridgeshire GP	
Referral process	Referral made by GP or health/social care professional	
Funding	Cambridgeshire & Peterborough ICS

Service Lead		
Contact e-mail		
NHS or Private Organisation?	NHS	Disability
Service Overview	<p>The team aim to maximise quality of life through supporting people and families to have a clear understanding of their condition and develop effective strategies to manage changes experienced.</p> <p>The team focus on enabling individuals and families or carers to increase a sense of confidence in managing emotional distress, uncertainty and changes in thinking skills. Where the person may not implement strategies, appropriate changes in the environment are identified.</p> <p>Where appropriate, assessments of thinking skills (cognitive assessment) can be completed to identify effective rehabilitation strategies in people with more complex needs. For people returning to work, comprehensive cognitive assessment can be provided to identify the support that may be required with demanding and complex roles.</p> <p>The team provides up to six weeks of neurorehabilitation. Therapeutic input can be provided at home as part of the early supported discharge service</p>

Service Lead	Alana Page Community Services Operations Manager
Contact e-mail	community.services@sueryder.org
NHS or Private Organisation?	Charity
Service Overview	<p>People with neurological conditions and complex needs are supported to live as independently as possible, in a home which has been specifically adapted to their requirements.</p> <p>For some people, supported living is a step forward, after having been through a rehabilitation programme at The Chantry Neurological Care Centre. For others, the support provided offers a realistic alternative to moving into a care home.</p> <p>The supported living service is tailored to meet the needs of each individual. The supported bungalow in Ipswich has four tenancies available and trained staff who can provide up to 24/7 support as needed.</p> <p>As well as providing a comfortable place to live and socialise with other residents, there is plenty of entertaining space for when friends and family to come to visit.</p>
Exclusion Criteria	Individuals under 18 years of age Individuals under Mental Health Section

Services based Outside of the East of England

**The following services are available to/for
patients from the East of England**

Abington View

Main Speciality	Specialist community-based community transitional neurological rehabilitation services for adult female residents who are not quite ready for supported living.	Adult
Host Trust	n/a	
Address	52 Abington Park Crescent, Northampton NN3	
Contact Telephone Number	01604 390234	
Website	activecaregroup.co.uk	
Service Lead	Suzie Smith	
Contact e-mail	referrals@activecaregroup.co.uk	Brain
NHS or Private Organisation?	Private	
Service Overview	<p>Abington View is based in Northamptonshire, strategically neighbouring other Neurological Rehabilitation facilities Christchurch View and Lloyd house, with whom it works in close partnership. The unit goal is to provide personalised transitional care to female residents to enable them to live increasingly independently, with the support of staff available 24/7.</p> <p>Abington View is a specialist transitional service, meaning the care and support is less intensive as residents are guided towards a more independent life as they become more capable of carrying out everyday tasks. Through personalised care plans the team maximise each resident's independence allowing them to work towards their goals.</p> <p>The unit aims to build upon the progress residents have already made and provide them with key life skills, with each resident having access to an interdisciplinary care team consisting of a Rehabilitation Medicine Consultant, Neuropsychology, Physiotherapists, Speech and Language Therapists and Occupational Therapists, as required.</p> <p>Abington View is located close to local shops and supermarkets, the park and amenities, so resident's benefit from social, occupational and educational opportunities in an ideal setting for specialist community based transitional rehabilitation.</p>	
Exclusion Criteria	Under 18. No neurological condition	
Catchment Area	National

Nottingham Brain Injury Rehabilitation and Neurological Care Centre

Main Speciality	Nottingham Brain Injury Rehabilitation and Neurological Care Centre , offers rehabilitation, care and support to male and female adults aged 18 and over with a brain injury or other neurological condition.		
Host Trust	N/A		
Address	Hankin Street, Hucknall NG15 7RR		
Contact Telephone Number	0115 968 0202		
Website	activecaregroup.co.uk		
Service Lead	Osvaldo Soetsane		
Contact e-mail	referrals@activecaregroup.co.uk		
NHS or Private Organisation?	Private		
Service Overview	<p>Specialised in the treatment, care and support of individuals with physical and cognitive impairments as a result of brain injury or other progressive neurological condition. With three distinct, yet complementary services on one site, 71 beds offering flexible care options are available from our specialist on-site team.</p> <p>Slow stream rehabilitation (Millwood) This service is for people who have already undergone rehabilitation and still require further therapy to reach their optimum level of recovery. It is also suitable for those who would find an intensive programme of care fatiguing and would make better progress on a longer less therapy-intensive programme. A range of rehabilitation therapies are provided to help people relearn and practice everyday skills to give them the best chance of a return home.</p> <p>High Dependency (Fernwood) A high dependency service where those with particularly complex nursing care needs are looked after. Residents may have tracheostomies, require assisted ventilation or may be minimally conscious. The service also cares for individuals who may be in the end stage of a progressive neurological illness.</p> <p>Residential (Rosewood) This service is suitable for people who, as a result of their brain injury, are unable to live at home independently usually because of the high level of nursing care they need. This service is also suitable for those who do not have complex nursing needs or require regular therapy, but still need round the clock support to manage everyday tasks, to keep safe and to have a good quality of life.</p>

Wycliffe House Neurological Rehabilitation Centre

Main Speciality	A dedicated rehabilitation and residential service for male and female adults who have a brain injury and current or historic substance misuse vulnerabilities.	Adult
Host Trust	N/A	
Address	2 Christchurch Road, Northampton, Northamptonshire, NN1 5LL	
Contact Telephone Number	01604 824203	
Website	activecaregroup.co.uk	
Service Lead	Suzie Smith	
Contact e-mail	referrals@activecaregroup.co.uk	
NHS or Private Organisation?	Private	Brain
Service Overview	<p>Wycliffe House can support those with associated past or present drug and alcohol addictions. In addition to a diagnosis of a neurological condition and addiction, service users may present with cognitive impairments, communication disorders and behaviours that challenge. The service is also able to admit service users who lack capacity to consent to treatment and are under a DoLS.</p> <p>The service seeks to engage service users through a highly empathic and non-judgmental approach. The team recognise that addiction affects every aspect of the individual's life and therefore seek external support for treatment programmes which focus not only on the addiction itself, but other dimensions of the individual's life including family role, work skills, and mental health.</p>	
Exclusion Criteria	Under 18 years of age
